## Overview

Slack is cloud-based team collaboration tools and services best known for persistent and searchable team communications in one place.

IBM Connections is a leading enterprise social software platform that helps people engage with networks of expertise in the context of critical business processes.

---

Slack in IBM Connections allows IBM Connections users to access, view and post messages in slack channels, directly from IBM Connections.

## Features

The following features are natively made available.

- Natively authenticate, access and use Slack, from IBM Connections
- Slack channels (separate community app) inside IBM Connections
  - List Slack channels
  - View messages in a channel
  - Post message in a channel
- Roadmap:
  - Direct message
  - Search

Supported, sustained, packaged integration with continued roadmap feature development. Your enablement key supports all updates throughout the year.
