AppSpokes Integrations for <any-Web-app>

Ready packaged integrations. Light configuration required

Note: As of Dec 2018, AppSpokes micro-services-based integrations which were originally created to support IBM Connections and DX (either on-premise or cloud host platforms) were updated to support ANY web-app - not the IBM platforms exclusively. The use cases, UX/UI designs apply ubiquitously, and the holistic design allows them to be used with most Web-app platforms. [Just ask](#).

This website is in the process of updating this information during December 2018.

Evaluate It and/or Get Quote

Yes - I would love to evaluate an AppSpokes integration for IBM Connections cloud or on-premise.
Fill out my [online form](#).
