Pricing

AppFusions believes integration solutions are needed in all corporations - large and small. Yet, at today's rates:

Custom Enterprise system-to-system integrations cost corporations \$20K - \$100K+ each, on spec. And that's only **initial costs**, not on-going support as end-points continue to roll versions.

In most cases, our Enterprise integrations cost less than \$1.00/month per-user. The per-user time savings value is much more! Our prices align with Atlassian server pricing tiers - for easy calculations, purchasing simplicity.

Annual license fees, including all feature/version updates.

Note:

- All add-on licenses must match the tier of your server license, just like all Atlassian add-on pricings.
- All prices subject to change, yet licenses prices can be secured with multi-year purchases.
- Renewal fees are 50% of list.
- Tier upgrade pricings are a calculation based on expiry dates and difference between tier pricings. Request quote from [AppFusions Accounts](#).
