Alfresco™ in Atlassian Confluence®

Access, embed, preview, edit (in Office applications),
download Alfresco files locally, embed list directories,
all from Confluence.

 AppFusions

[\[What does it do? \]](#) [\[Video \]](#)

What does it do?

When Confluence and Alfresco are integrated, Confluence users can access, list, display, edit, download Alfresco files from Confluence:

- Plug and play integration application.
- CMIS-standard based
- Embed any attachment, and it is pulled directly from Alfresco.
- Edit Alfresco files in Confluence using Office applications - regardless of browser or OS you are running.
- High resolution viewer so you can do presentations with Alfresco files directly from Confluence pages.
- Alfresco file management from within Confluence
- Alfresco function buttons available within Confluence
